What do we know about the fifth house? It is said to give us pleasure, romances, entertainment, honor, etc., in short: a lot of fun. It is a house in which it is said that we do what we like and enjoy. But the question is: do you really have fun with this house? And astrologically spoken: do you really enjoy the planets in your fifth house?

Some astrologers would say that not every planet in the fifth house gives joy. If we read what is written about Saturn in the 5<sup>th</sup> house, it seems that there will be no fun at all. But after decades of experience I can tell that yes, you can have a lot of fun with Saturn in the 5<sup>th</sup> house, and at the same time I have seen people with Jupiter and Venus in the 5<sup>th</sup> house who almost never laugh. In principle every planet in the 5<sup>th</sup> house is an instrument to have pleasure. Of course, you first must know what you like. Another important question is: do you know who you are? Are you living from your inner center? Do you love and accept yourself? For most of us, that is still a big issue, but self-acceptance is essential for the 5<sup>th</sup> house to unfold itself.

The fifth house is THE house with which we express our identity. It describes what our needs and wishes are to express ourself. We don't do this for others, the fifth house is OURS, it is directed towards our inner need to be who we are.
