

Sexuality, astrology, therapy.

€ 25.00

Sexuality is a complicated phenomenon and much more than Venus, Mars and the 5th house. Studying the influence of culture and religion, biology and psychology on our attitude towards sexuality for many years, and having clients who openly discussed their sexual problems, I came to a new and much deeper understanding of the astrological dynamics in the chart related to sexuality.

In this lecture I will show what the influence of culture and religion is, what the psychological consequences are, and how sexuality can be part of an escape mechanism, or part of a personality disorder, and much more, and how this is mirrored in the chart. We will study the charts of well-known people whose sexual life has been studied and documented. And of course, we will look at what several planets and houses ask from us to be able to really experience true intimacy in sexuality and enjoy.
