Yods and unaspected planets in synastry.

€ 25.00

Yods and unaspected planets in the birth chart are very dynamic and it takes time to understand their hidden gifts, as they often bring doubt and confusion first. Their role in synastry is important, as they can produce smokescreens and fascination at the very same time. If you have had important synastry aspects to yods or unaspected planets when young (for example with parents or brothers and sisters), these can still influence your relationships when adult. We will analyze their dynamics both in the birth chart and in synastry, and try to understand their meaning in relationships, whether it be love relationships or parent-child.

We will start with a short introduction to yods and unaspected planets, to be clear about the concepts, the orbs, and how to interpret them in the birth chart. Once we understand that, we can look at their special dynamic in synastry using fascinating examples.
